

As of August 1, 2012, our Specialized Business Docket has been in operation for nine months. Since inception, we have had a total of 19 cases placed on the SBD. As of today, six of those cases have closed, all without going to trial. The average number of days these cases were open on the court docket was 109.

We have recently designed a survey through Survey Monkey and will soon begin emailing it to counsel on closed cases for feedback as to the process and whether or not the process made their cases easier and/or more cost effective to litigate.

We are also in the process of forming a review committee to evaluate the first year of operation, review the survey results and make any necessary changes to continue to improve the SBD.
